

## Overview

Questionmark™ Perception™ enables educators and trainers to author, schedule, deliver, and report on surveys, quizzes, tests and exams. This complete assessment management system enables you to create questions and organize them into exams, quizzes, tests or surveys. You can schedule people to take the assessments, deliver them in a variety of ways and then view the results in 12 different report types. Questionmark Perception offers a cost-effective, easy way to not only to measure knowledge, skills and attitudes -- but also enhance the learning process.

Questionmark's holistic approach means users can count on more than just feature rich software -- but also knowledge bases, manuals, upgrades, consulting services, training courses, and partnering relationships to ensure customer's success with the software. This chart, and the others in the series focus on the features rather than all of the service offerings. For more information on those please contact Questionmark customer service at +44 (0)800 731 5895 or +44 (0)20 7263 7575 or info@questionmark.co.uk.

Key features	Perception	Competitive Product
